Futures Wheel

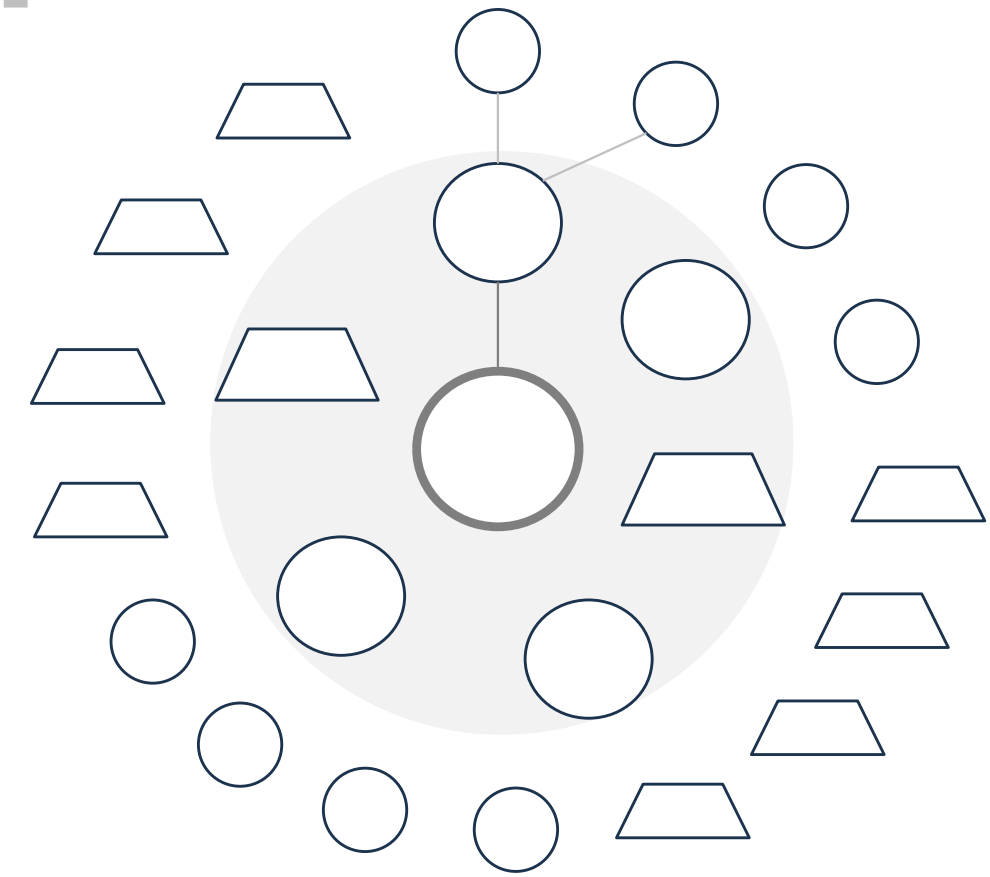

Lewrick, M.
Design Thinking for Humanity
ISBN: 9781394366392
www.design-humanity.com

Quick guide: The Futures Wheel is a visual brainstorming tool that maps the direct and cascading consequences of a future event or trend, radiating outward in rings of first, second, and third-order effects.

More tips & tricks on book page: 100

1 Anchor Core Disruptive Event

What primary challenge, signal, technology breakthrough, or alternative scenario parameter serves as our baseline matrix shock?

Example of application:

- *Center: The Challenge*
- *Circle Human: Direct/Indirect results are impacts on immediate human-realted aspects*
- *Polyvon Planet: Direct/Indirect results include impacts to planet*

2 Map Cascading Impact Trajectories

Isolate immediate direct Impacts

3 Map Second-Order Ripples

Trace how those variables interact to generate complex secondary modifications.
